Jesse Martin

Senior Embedded Software Engineer

Senior Embedded Software Engineer with 13 years of experience developing firmware and embedded systems for automotive and IoT devices. Skilled in C, C++, real-time operating systems (RTOS), and hardware-software integration. Known for delivering reliable systems that meet safety and compliance standards.

Personal Information

(123) 456-7890

jesse.martin@email.com

LinkedIn

Detroit, MI

Key Skills

- C and C++ programming
- Embedded firmware design
- IoT device optimization
- Real-time operating systems
- Safety compliance (ISO 26262)

Education

Bachelor of Science in Electrical Engineering University of Michigan

May 2010

Professional Experience

SENIOR EMBEDDED ENGINEER | AUTOTECH SYSTEMS | DETROIT, MI
SEPTEMBER 2015 – PRESENT

- Designed embedded software for advanced driver-assistance systems (ADAS), improving safety scores by 25% across product lines
- Optimized firmware for IoT devices, extending battery life by 18% and reducing power consumption
- Led debugging initiatives that resolved hardware-software integration issues, cutting failure rates by 20%

EMBEDDED SOFTWARE ENGINEER | BRIGHTLINE ROBOTICS | ANN ARBOR, MI
JUNE 2010 – SEPTEMBER 2015

- Built firmware for robotic control systems, enabling precise navigation with 95% accuracy
- Developed real-time systems supporting 24/7 industrial operations, reducing downtime by 30%
- Partnered with cross-functional teams to achieve ISO 26262 safety compliance

Certifications

- Certified Embedded Systems Engineer | 2012
- Automotive SPICE Proficiency Certification | 2014
